The Category 6A, S/FTP patch cables feature a PUR jacket that provides good resistance to oil, making them suitable for industrial use. Additional properties of the PUR jacket include UV resistance and self-extinguishing properties in the event of a fire. DIGITUS® Category 6A Class EA patch cables are manufactured and tested in accordance with the ISO/IEC 11801 and DIN EN 50173 CAT 6A standards. They ensure that the cable installation complies with the ISO & EN Channel specifications and deliver outstanding performance in DIGITUS® CAT 6A cabling. Performance has been tested up to 500 MHz, including performance characteristics such as near-end crosstalk (NEXT). They have been specifically designed to fully meet all requirements across various application areas. Each cable is equipped with an injection-molded kink-protection sleeve with strain relief. Additionally, the sleeve features a latch protection mechanism that prevents the cables from getting snagged and the latch from breaking off the connector.
